Technical Skills

Languages: Python, Java, JavaScript, C
Frontend: React, HTML, CSS, Tailwind CSS
Backend: Node.js, Express.js, Flask, REST APIs
Databases: MongoDB, MySQL
DevOps / Cloud: Git, CI/CD, Docker, Linux
Tools: GitHub, Postman, VS Code

Education

Amrita Vishwa Vidyapeetham *Aug 2023 – Present*
B.Tech in Computer Science and Engineering
CGPA: 8.61 / 10.0
Relevant Coursework: Data Structures, OOP, Operating Systems, Computer Networks, Distributed Systems , DBMS, DAA

Experience

Prime Intern — Presidio Solutions Pvt. Ltd., Chennai *6 weeks*

- Built backend services using Node.js and Flask in a microservices environment.
- Designed REST APIs and worked on system integration.
- Followed Git workflows, including branching, PRs, and debugging.
- Exposed to CI/CD pipelines, Linux-based environments, and deployment workflows

University Projects

Tantrotsav 2025, Official College Technical Fest Platform [Website] | [GitHub] *MERN Stack*

- Contributed as a **Core Frontend Developer** on a MERN stack platform that supported registrations for 1,800+ participants and processed secure payments worth over 3.5 lakhs.
- Implemented secure payment workflows and frontend features for a platform used by 1,800+ users.

SICA, Retrieval-Augmented Chatbot [GitHub] *MERN Stack, Gemini API*

- Developed SICA, an AI-powered student chatbot using the Gemini API and RAG for context-sensitive college-related responses, achieving 90% retrieval accuracy and handling 500+ student queries in tests.
- **Integrated RAG-based retrieval pipeline** with backend services and frontend interface.

VS Code Folder Launcher [GitHub] *Python, Windows, PowerShell Scripting*

- Built a native Windows Python utility to open target folders directly in VS Code, reducing the number of steps to create and open a folder by 50% and streamlined project switching and setup.
- Implemented CLI-based workflow automation using Python and PowerShell.

Achievements

- Winner — PIC to PAGE (Frontend Development Competition) *December 2025*
- 4th Place — TechBiz Hackathon, *September 2025*
- Winner — Chip X *January 2025*
- Winner — Technopoly *January 2025*

Certificates

- **Machine Learning Specialization** – Stanford Online, Andrew Ng [Certificate]
- **Python Data Structures** [Certificate]
- **Using Python to Access Web Data** [Certificate]
